

TrueWorkShop™ Schedule for February – July 2016

Our Goal is Your Implementation of Best Practices

TrueWorkShops™ from TMEII are today's best educational value for three key reasons; **a)** our personal follow-up **b)** one-on-one coaching and **c)** guaranteed measurable results to help you apply the best practices from each session. Every attendee receives The Scoreboard for Maintenance Excellence™ as a self-assessment tool, to apply the key topics from each TrueWorkShop™ and to implement a personal plan of action developed for each session. It includes 26 best practice areas and 300 evaluation items. We want to help you implement your best practice plan of action developed as part of each TrueWorkShop™. Attendees prepare a class presentation to also present to their company when they return home. Successful implementation is your key to results and we want to make that happen!

2016 Brings a Free 2-Day Session *Maximizing the Value of Your Computerized Maintenance Management System* With Each 3-Day Session You Attend.

Effective CMMS is essential to support all best practices. Your primary instructor has published two major books; *Maintenance Benchmarking and Best Practices: A Profit & Customer-Centered Approach* by McGraw Hill plus in 2014, *Reliable Maintenance Planning, Estimating and Scheduling* by Elsevier Gulf Publishing Division. He also published as editor/primary author *The Guide to Computerized Maintenance Management Systems (CMMS)* from Scientific American LLC. This is a step-by-step guide to the evaluation, selection, successful implementation, and improvement of modern systems for effective physical asset management. This very comprehensive 2-day free session allows every attendee of a 3-day course to stay over for this important topic. From our work with over 200 clients and thousands in worldwide workshops, most admit their CMMS is very much underutilized. This why in 2016 TMEII has this 2-day session as a free session. And if your attendees cannot stay for 5 full days, we allow them to come back for any future session, also at no charge.

Remember: Your Training is “Not Over When it is Over!”

This is very important to remember! For each TrueWorkShops™ we like to have a 2-4 person team come and work together. Bring a foursome for golf and training and you can also save 25%. There is scheduled Team Work with instructor facilitation support so we invite “Top Leaders”, “Maintenance Leaders” & “Craft Leaders” to come as a team. Yogi Berra, the famous New York Yankee catcher often said, “It Ain’t Over Until it is Over!” Your session is “Definitely Not Over When It’s Over.” Following completion of each TrueWorkShops™, there is a personalized follow-up scheduled for each organization attending. There is absolutely no extra charge.

The Maintenance Excellence Institute International
6809 Foxfire Place, Suite 100, Raleigh, NC 27615 & 2625 East Beach Drive, Oak Island, NC 28465

The Maintenance Excellence Institute International: Worldwide Services with Measured Shop Level Results

Achieve a 10-to-1 Return on Your Training Investment

Important Pre-Course Work: We ask each attendee (or team) to do two things before they arrive which is to be used during class team work.

1. Develop a list of the Top 5 Areas for Improvement that they see within their organization (All attendees are to do this one individually)
2. Complete *The Scoreboard for Maintenance Excellence™* as a self-assessment of their current maintenance and asset management operation (This will be performed as a team within the site with guidance from TMEII).

Each attendee will use their documents during class exercises to include developing a Plan of Action for the Top 5 Areas for improvement in their organization. And, we also provide a tool to validate your results; *The Reliable Maintenance Excellence Index™*. Our focus is on creating a return on investment from your training experience. We guarantee a 10-to-1 Return on Maintenance Investment (ROMI) when you apply the best practices from your session.

You Receive an Extensive Maintenance Training Resource Library

For over 15 years, TMEII has developed a knowledge base for maintenance and asset management that is second to none. An extensive electronic library with two major books; *Maintenance Benchmarking and Best Practices: A Profit & Customer-Centered* and *Reliable Maintenance Planning, Estimating and Scheduling plus The Guide to Computerized Maintenance Management Systems (CMMS)* are included. All of this in addition to the complete PowerPoint slide sets for each course, numerous articles from TMEII Founder, and Alliance Team Members. In addition, we provide other Scoreboards specific to oil-gas-petrochemical, plant maintenance, facilities maintenance, healthcare facilities maintenance and fleet management. These are also available along with references collected by TMEII founder over the past 40 years. We establish your team with a knowledge base that can be used for continuous education for a lifetime.

Again for 2016 *The Maintenance Planning for Excellence Series is Offered*
This is Four (4) Interrelated Sessions Starting April 4-15th at Oak Island, NC

“What is a TrueWorkShop™?”

It is all about Return-on-Maintenance Investments (ROMI)

The Maintenance Excellence Institute International believes you can put our training topics into action. The principles and practices we cover can be taken back and put into practice for a true return-on-maintenance investment (ROMI). We provide extensive practical exercises on key topics, extensive idea sharing and instructor’s case studies from over 300 plant and facility sites. All TrueWorkShops™ require some pre course work. We also provide each attendee with four of today’s most comprehensive benchmarking tools a \$300 value.

[The Scoreboard for Maintenance Excellence™](#) is one tool most attendees can complete as a self-assessment prior to their course start date. By using our Scoreboard and training you will define strategic, tactical and operational and “Do It Now” plans of action for your own improvement opportunities. You will develop and take home from this course a presentation for Maintenance Leaders & Top Leaders.

Benefits and Value: A clear understanding of today's best practices is so important to their successful application. We have helped very large organizations such as Boeing and the Air Combat Command develop a client specific [Scoreboard for Maintenance Excellence™](#) for multiple sites. From this we found concurrent best practice training was necessary so members of the organization truly understood the full potential of our assessment results.

As for Benefits and Value: There is one guarantee we can personally make to you. This TrueWorkShop™ will help bring the firepower to reinforce your current needs to the Top Leaders in your organization! We will help you be “the maintenance messenger” to get action from your Top Leaders. We can personally help you make a difference in the total operations success of your organization if you attend this event! Top Leaders must clearly understand your needs, and the consequences of gambling with maintenance costs. Beware if your organization is still gambling heavy with maintenance cost\$.

Oak Island, North Carolina

On the next page, you will see what many of our TrueWorkShop™ attendees have called “the best place ever to hold a training event”. Here we train hard, have fun, tour plants and see what maintenance on the battleship USS North Carolina was all about from a sailor on this fine ship during World War II.

Oak Island, (OI) is where you can bring your family and “close friends.” Take a much needed and deserved “business vacation.” At OI we have much to keep you busy and with world famous Myrtle Beach is less than a 1hr. drive.

TrueWorkShop™ Location: The Oak Island Golf Club
Oak Island, North Carolina

The Oak Island Golf Club is host to The Maintenance Excellence Institute International's TrueWorkShops™ during the spring and fall at their famous Duffer's conference & dining facility.

Getting to Oak Island: Oak Island is 30 miles southwest of Wilmington, Take I-40 East; from the Wilmington International Airport (ILM). Exit on MLK Blvd. then go to US 17 South on to Route 133 South to Oak Island. The Oak Island Golf Club is located 1 mile on the left just after you cross the bridge on NC-133 to Oak Island.

Duffer's has beautiful scenery of the ocean, the beach and the George Cobb designed golf course just outside the windows of the conference/dining room. Look left to see the 18th green and to right for the Atlantic Ocean.
