

CONTINUOUS RELIABILITY IMPROVEMENT OF ROTATING EQUIPMENT

Reliability optimization through component condition monitoring, vibration analysis & root cause analysis

28th – 30th April 2013

Metropolitan Palace Hotel ,Dubai, U.A.E

Ralph W. "Pete" Peters

President

The Maintenance Excellence Institute(TMEI), USA

Peters has over 35 years of practical engineering expertise, operation management and maintenance international experience at the shop level and corporate levels. Pete has taught companies in the US, Middle East and Asia. His clients include British Petroleum, UNC-Chapel Hill, Air Combat Command, Boeing, Heinz, General Foods, Marathon Oil, Polaroid, Great River Energy, Wyeth-Ayerst, Cooper Industries, National Gypsum, Lucent Technologies.

You will take away:

Four benchmarking tools in excel format:

- The scorecard for maintenance excellence maximizes overall best practices
- THE CMMS BENCHMARKING SYSTEM optimizes your technology investment (CMMS)
- The maintenance and excellence index validates bottom-line results
- The ACE TEAM PROCESS assures reliable planning times

2 Complimentary e-books

- Maximizing maintenance operations for profit optimization
- Maximizing the value of facilities management operations +

A maintenance toolbox:

- Achieve results from your maintenance audit
- A guide to maintenance excellence in your organization
- Extensive material on the course CD that has been used in many consulting projects

Bonus for early bird registration!

Participants will receive the "Maintenance Benchmarking and Best Practices" book by Raph W. Peters published by McGraw-Hill's Professional Book Division Limited to strictly the first 10 delegates on board!

Upon successful completion of the course, participants will be able to gain knowledge on the following:

- Key elements of reliability centered maintenance
- Important risk based maintenance concepts
- Use the scoreboard for maintenance excellence
- Tackle all rotating equipment problems by identifying and understanding the root cause beyond with REAL LIVE CASE STUDIES
- Optimize the reliability of rotating equipment with the BEST PRACTICES learnt
- Learn a wealth of information with INDUSTRY COMPETITORS through OPEN DISCUSSIONS and INTERACTIVE SESSIONS

Course customization to your priorities

Today's most comprehensive benchmarking tool; **THE SCOREBOARD FOR MAINTENANCE EXCELLENCE** (A pre-course maintenance assessment) will be issued to delegates immediately upon registration.

This important pre-course work allows each attendee to address their Top 5 specific improvement needs and concerns. The trainer will discuss these needs at the workshop during a group practical exercise.

CONTINUOUS RELIABILITY IMPROVEMENT OF ROTATING EQUIPMENT

28th-30th April 2013 Metropolitan Palace Hotel, Dubai, U.A.E

Overview:

Most organizations focus more on cutting maintenance cost. The root cause of this is shortsightedness and this results in reliability loss with crippled assets. When business is bad, companies typically do not have enough money to support improving their processes. This is a common conundrum - addressing the issue requires discipline and this brings about radical, yet positive change that will assure our future prosperity.

THE CONTINUOUS RELIABILITY IMPROVEMENT (CRI) and optimization of rotating equipment has been widely investigated by world class process companies during the last decade. Concentrating exclusively on redundancy allocation as per the old fashion maintenance is not the answer. To know how to effectively prevent equipment failures, conduct a successful root cause failure analysis and improve condition monitoring for rotating equipment are continuing challenges for engineers. Proper analysis and solving of chronic problems at the source saves time and money.

This course is designed to explain the following:

- Effective methods of component condition monitoring for use as both a predictive maintenance
- Major failure causes
- World class proven root cause analysis procedure with exercises and case histories and more.....

Speaker's profile:

Ralph W. "Pete" Peters
President
The Maintenance Excellence Institute(TMEI), USA

Ralph W. "Pete" Peters is a highly recognized leader around the World in the areas of implementing maintenance best practices, developing effective productivity measurement and initiating long term operational improvement processes, within both the public and private sectors such as British Petroleum, Nigeria Liquid Natural Gas, UNC-Chapel Hill, Clemson University, Atomic Energy Canada Ltd, Boeing Commercial Airplane Group, Caterpillar, Ford, Honda, Anderson Packaging Inc, Polaroid, Lucent, Heinz, General Foods, BigLots Stores, Sheetz Inc, Marathon Oil Corporation, Great River Energy, Wyeth-Ayerst (US & IR), Cooper Industries, National Gypsum, Sarasota County Government-Operations and Maintenance Division, Carolinas Medical Center, NC Department of Transportation, NC Department of Health and Human Services and the US Army Corps of Engineers.

Pete has helped achieve success and return on investment in plant, fleet, healthcare operations and pure facilities maintenance operations as well as golf course maintenance and for the "green industry". As a frequent speaker, he has delivered speeches and seminars on maintenance-related topics worldwide. He is also the author of a best selling McGraw-Hill Professional Division book; Maintenance Benchmarking and Best Practices- A Profit and Customer-Centered Approach. His 35 years of experience has made him an expert in maintenance with a vision that "Maintenance is forever!"

Who Should Attend?

- *Engineers, Managers, Supervisors, Superintendents, Specialists and Technicians responsible for:*

- *Application*
- *Condition Monitoring*
- *Equipment Operation*
- *Equipment Support*
- *Mechanical Engineering*
- *Maintenance*
- *Operations*
- *Plants*
- *Predictive Maintenance*
- *Production*
- *Reliability*
- *Rotating Equipment*
- *Technical Services*

From sectors such as: oil, gas and power, petrochemical, pharmaceutical, water treatment plants, automation, construction, food and beverage, mining, textile, pulp and paper, chemical and etc.

**Day
One**

Workshop commences at 09.00 and ends at 17.30

Course overview

- Course objectives
- Delegate expectations
- Exercise: review of top 5 priorities by attendees

Discussion: what concerns and obstacles do you have in your current organization

Rotating equipment failure patterns

- Distinguishing between repairable and non-repairable equipment
- Types of equipment failure
- Areas of the Bath-Tub curve
- Actions to minimize failure effect

Discussion: how does most of your equipment fail?

Mastering the basic best practices of reliability maintenance for rotating equipment

- Introduction of scoreboard for maintenance excellence for applying today's best practices
- Framework for reliability and maintenance excellence
- Plant and machinery downtime and how to measure accurately
- Troubleshooting key pieces of equipment
- Machinery design Issues for reliability & maintainability
- Introduction to condition based maintenance
- Factors contributing to excessive maintenance

Discussion: has your plant implemented basic best practices?

Wrap up of Day One and assignment for day two

**Day
Two**

Workshop commences at 09.00 and ends at 17.30

Mastering the advanced reliability maintenance for rotating equipment (Part 1)

Root cause failure analysis (RCFA)

- Structured problem solving and RCFA
- Failure types
- Collecting failure data
- Describing the process
- Solutions to human root cause
- Cause analysis
- The three levels of cause
- The analysis process
- Human root causes

Exercise: RCFA practical exercise

Rotating equipment operating problems

- 6 major rotating equipment problems
- Vibration and its control
- Balance and its control
- Lubrication and its control

Exercise: Operating problems with case studies on gearboxes, axial and centrifugal fans, compressors

- Looseness and its control
- Distortion and its control
- Alignment and its control

Exercise: Operating problems with case studies on pumps, bearings, valves, bucket elevators

Day Three Workshop commences at 09.00 and ends at 17.30

Mastering the advanced reliability maintenance for rotating equipment (Part 2)

Component condition monitoring techniques

- Types of condition-based monitoring
- Vibration monitoring
- Pump monitoring frequency
- Temperature based monitoring
- Infrared monitoring

Discussion:

1. What monitoring techniques are employed at your plant?
2. Have they proven effective?
3. CBM case studies

- Analytical-case tools
- Data analysis
- Weibul analysis

Discussions:

1. Is CMMS providing data or true reliability information?
2. Is data routinely analyzed and used for decision-making?
3. What kind of analysis is done?

Measuring results from continuous reliability improvement – Changing to reliability focus operation

- The scoreboard for maintenance excellence
- 1. Defining global best practices and your baseline
- 2. Defines “where you are”

Case study: Marathon Oil

- The CMMS benchmarking system
- 1. Evaluates existing CMMS’ support to reliability of rotating equipment
- 2. Why CMMS implementation fail to achieve planned benefits

- The maintenance excellence index: A proven method to define your results to top leaders
- Key metrics and KPI’s to consider for your maintenance excellence index
- Other measures to validate reliability

Exercise: Developing metrics and KPI’s for your operation using the maintenance excellence index

Case study: Steel mill operation

Case Studies:

- Bearing failure case study
- Bearing vibration signature analysis case study
- In-situ shift balancing case study
- RCFA exercise
- FMEA exercise
- Failure impact and cost analysis exercise
- Removing soft-foot activity

“Put on Your Thinking Cap!” session -
Open forum:

- a) Define Top 5 Areas for Best Practice Improvement
- b) Define Top 5 Reasons for Reliability Problems in Your Current Operation

Presentation of certifications and wrap up of day three

Please complete this form immediately and email back to:

 Fax : _____
 E-mail : _____

NOTE: Please fill all details in this registration form.

■ INVESTMENT FEE:

■ Payment Details

Payment is required within 5 days upon receipt of the invoice.

i. Cheques / Bank Transfer

Account Name: SQ International
 Faysal Bank Limited
 Karachi, Pakistan.
 Account No: 8422421011
 Swift Code: FAYSPKKA
 All payment must be received prior to the event date.

ii. Credit Card Payments (Please fill below)

Credit Card: Visa  Mastercard  (please circle)

Name on the Card : _____
 Credit Card No.: _____
 Card Verification Code: _____
 (Last 3 numbers below the magnetic bar at the back of the Card)
 Expiry Date: _____
 Signature: _____

Payment Terms

Payment is due upon invoice issuance thru a credit card or Bank Transfer. All Payments must be received before the event to secure attendance. All registration received 2 weeks before event date, required credit card details to guarantee your place at the event. All booking received with any early bird discounts must be paid before or on the early bird date, otherwise the normal fee applies.

Cancellations/Substitution & Postponement Policy

Substitutions are welcome at any time. Please notify us at least 3 working days prior to the event. For cancellations received 7 days before the event date the client will receive 100% credit less 10% administration fee, to be used at any future event. For cancellations received less than 7 days from event date, no credits will be issued, but course materials will still be couriered.

SQ International reserves the right to postpone/cancel any event due to unforeseen circumstances. In such cases the client payments at the postponement/ cancellation date will be credited towards the rescheduled date or 100% credit for any other SQ International future events.

SQ International is not responsible for any loss or damage suffered by the client as a result of a replacement, modification or cancellation/postponement of an event.

Program Changes

Please note that speakers, topics, case studies etc are correct at the time of publishing. Due to circumstances beyond SQ International control, SQ International reserves the right to replace any speaker and later any topics of the event.

Venue & Accommodation

For hotel reservations please contact the hotel directly. Due to high occupancy rates, we highly recommend that you book early to avoid last minute inconvenience.
